

Weather Station operational - 10 April 2008

Written by Basil Cambanis
Thursday, 10 April 2008 02:00

The Internet connection has been stabilised and updates are taking place every 15 minutes between 6am and 7pm, and hourly at night. The last remaining problem is the ad-hoc disconnection between the base and remote stations. This does not happen often, but no readings are picked up when this happens until the base station is reset which requires someone on site.
